Ebook Templates dot Net

## Chapter 1 Title Here

This is your chapter text. There are no tables in this particular ebook template. What you see here is simply a moving of margins to achieve the indented look.

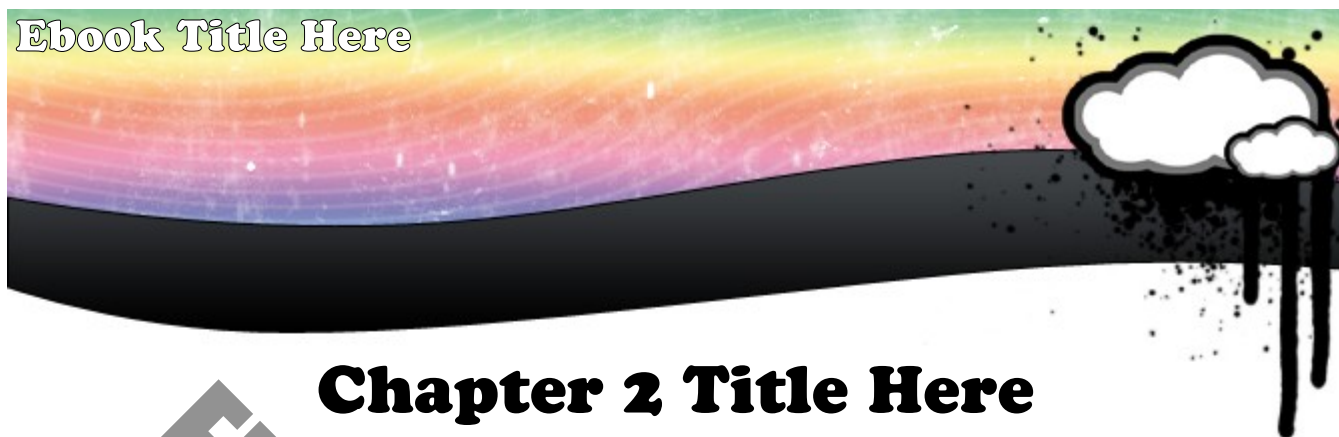

What and where are these margin "movers"? Well, when you open up this, or any other EZ Ebook Template file inside of OpenOffice Writer, you will see a numbered bar at the top of every document.

Just look up and you should see it now ^^^^. It will be numbered similar 1 . . . . | . . . . 2 . . . . | . . . . 3 . . . . | . . . . 4 and so forth.

Now, you should see 2 triangular shapes sitting on the numbered line above. They sort of look as if they are stacked on top of one another with the top points facing. Sort of like an hourglass figure.

Holding down the left click, just drag those and you will see the text either indent or expand.

Easy, right?

## Chapter 2 Title Here

You will further notice that this EZ Ebook Template has taken a new and exciting direction!

What is that direction precisely?

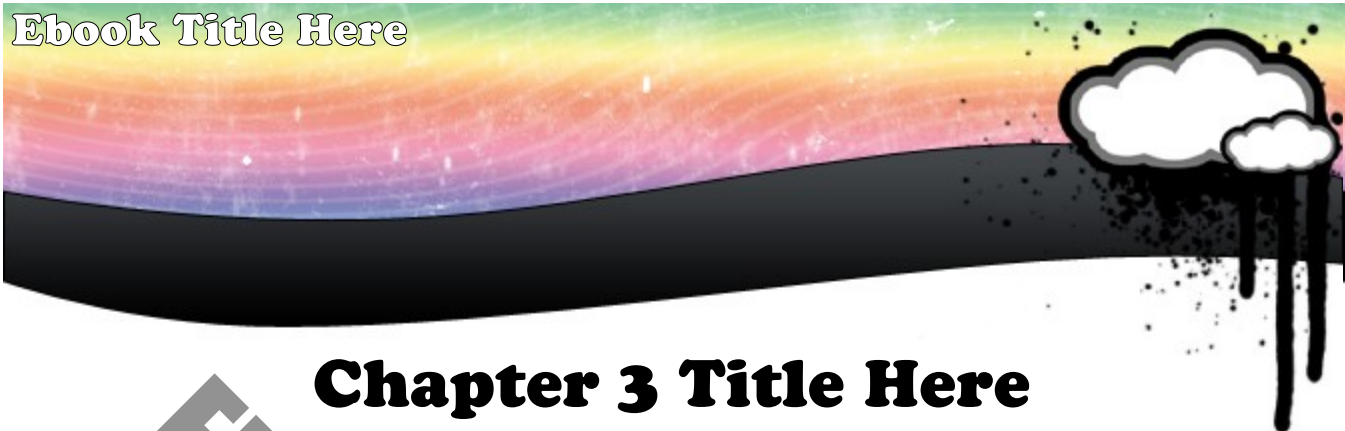

I like to call it "Grunge 2.0".

Obviously, it isn't a "real" term, but it's close enough to describe what you will be seeing as a more happening "trend". Or, maybe you already have.

"Grunge 2.0" is a combination of web 2.0 style with subtle grunge elements. And it looks pretty cool. Plus, it gives your product a whole new look and feel, setting it further apart from the pack!

I hope you enjoy using it, and all the other EZ Ebook Templates. They are a labor of love. For me, and, hopefully, for you too as a user ;-).

Ebook Title Here

## Chapter 3 Title Here

All we have here is some filler text for another ebook chapter. Editing this template is really simple.

To do it, just highlight by left clicking and dragging all the text that you see here and then pasting your own unique ebook content.

That's really all there is to it.

But, you may have to add some extra "carriage returns", or just hit the 'enter' key a few times, so that your text doesn't run over top of the header portion of the background.

Because there are no tables, adding your content has become even easier for you.

A few carriage returns here and there, and BAM! A lovely little ebook with a custom flare that showcases your unique content.

Can't get any easier than that!
